Westwood, NJ – Magestic Systems, Inc (MSI) announced today their strategic partnership with Applied PLM, a reseller of Dassault Systèmes (DS) PLM solutions in the United Kingdom.

Applied is a top performing Dassault Systèmes Business Partner focused largely on distributing DS PLM Solutions to help revolutionize the process for manufacturing complex products.

Magestic Systems' technologies – TruNEST CAA V5 Composites Based and TruLASER View CAA V5 Composites Based – are an integral part of the overall DS PLM Solution and add value to the DS suite of applications by providing manufacturers the ability to optimize their material usage, labor costs, and manufacturing process.

Mike Weber, Vice President of Operations & Business Development, points out: “Magestic Systems has been working with Dassault Systèmes for some time now and we are excited to begin expanding our network through mutual partners. The team at Applied has a long list of accomplishments and success. Combine that with our own track record and the groundwork for future success has been set. It is now our job to build on this foundation together and deliver the best in it class solutions to our current and new customers”

Shaun Clark, Applied PLM's Managing Director, comments “The addition of Magestic Systems' CATIA integrated and standalone software tools will provide increased added value to both our existing customers and to the CATIA user community as a whole. Our focus will be on the needs of UK aerospace and defence, automotive, rail, marine and renewable energy manufacturers, both OEM's and Supply Chain, whose products include composite and sheet metal component design and manufacturing processes.”

The partnership between Magestic Systems and Applied will introduce MSI technologies to the United Kingdom effective immediately and will provide a much fuller solution for current DS PLM users in that region.

Magestic Systems, Inc. is a global leader in Enterprise Software Development and specializes in material and process optimization across all CNC Cutting and Laser Projection applications. An innovator in the manufacturing industry since 1991, the Magestic Systems, Inc. portfolio includes a wide variety of turnkey solutions that assist manufacturers through the entire process of taking a design and turning it into a product.
